

Product sheet

SNU-449 | 305429

General Information

Description	SNU-449 is a human cell line derived from a patient with Hepatocellular Carcinoma (HCC). It is a continuous cell line that grows in suspension culture. SNU-449 is a highly tumorigenic cell line that is used for the study of liver cancer. It is characterized by its ability to form xenografts in immunodeficient mice. SNU-449 is a highly tumorigenic cell line that is used for the study of liver cancer. It is characterized by its ability to form xenografts in immunodeficient mice.
Organism	Human
Tissue	Liver
Disease	Hepatocellular Carcinoma (HCC)
Synonyms	SNU449, NCI-SNU-449

Cell Line Characteristics

Age	52 years
Gender	Male
Ethnicity	Chinese
Morphology	Epithelial
Growth properties	Adherent

Identification and Safety

Citation	SNU-449 (ATCC CRL-2254) (305429)
Biosafety level	2
NCBI_TaxID	9606
CellosaurusAccession	CVCL_0454

Additional Information
