MDA-MB-231-Luc | 305693

XXXXXXXXXX XXXXX

Description MDA-MB-231-Luciferase (MDA-MB-231-Luc) is a cell line derived from a human breast cancer cell line (MDA-MB-231) that is highly metastatic and is characterized by the presence of ER, PR, and HER2. MDA-MB-231-Luc is a derivative of MDA-MB-231 that has been engineered to express a luciferase reporter gene under the control of the MDA-MB-231 promoter. MDA-MB-231-Luc is a highly metastatic cell line that is characterized by the presence of ER, PR, and HER2. MDA-MB-231-Luc is a derivative of MDA-MB-231 that has been engineered to express a luciferase reporter gene under the control of the MDA-MB-231 promoter.
