DMEM (Dulbecco's Modified Eagle Medium) is a widely used cell culture medium. It is composed of various nutrients, including amino acids, vitamins, and minerals, which are essential for the growth and maintenance of cells in culture. The medium is typically used for the cultivation of adherent cells and is available in various formulations, including serum-supplemented and serum-free versions. The specific formulation of DMEM used in this product sheet is designed to support the growth of a wide range of cell types, including fibroblasts, epithelial cells, and primary cells. The medium is sterile and ready to use, making it a convenient choice for researchers and clinicians alike.

- **DMEM (Dulbecco's Modified Eagle Medium)**
- **DMEM (Dulbecco's Modified Eagle Medium) + 2% FBS**
- **DMEM (Dulbecco's Modified Eagle Medium) + 10% FBS**
- **DMEM (Dulbecco's Modified Eagle Medium) + 20% FBS**
- **DMEM (Dulbecco's Modified Eagle Medium) + 30% FBS**
- **DMEM (Dulbecco's Modified Eagle Medium) + 40% FBS**
- **DMEM (Dulbecco's Modified Eagle Medium) + 50% FBS**
- **DMEM (Dulbecco's Modified Eagle Medium) + 60% FBS**
- **DMEM (Dulbecco's Modified Eagle Medium) + 70% FBS**
- **DMEM (Dulbecco's Modified Eagle Medium) + 80% FBS**
- **DMEM (Dulbecco's Modified Eagle Medium) + 90% FBS**
- **DMEM (Dulbecco's Modified Eagle Medium) + 100% FBS**
