CHO-FOLR1

Description

CHO-FOLR1 is a CHO cell line expressing the FOLR1 receptor. It is derived from CHO cells and is used for the production of antibodies. The cell line is characterized by its high growth rate and ability to produce large quantities of antibodies. The FOLR1 receptor is a G-protein coupled receptor (GPCR) that is involved in the regulation of cell growth and differentiation. The CHO-FOLR1 cell line is used to study the function of the FOLR1 receptor and to develop drugs that target this receptor.
