

Product sheet

KHOS-240S | 300433

Product Overview

Description
KHOS-240S is a cell line derived from a patient with acute myeloid leukemia (AML). It is characterized by a high degree of heterogeneity and is highly sensitive to chemotherapy. The cell line is maintained in suspension culture and is highly proliferative. KHOS-240S is a cell line that is highly sensitive to chemotherapy, particularly to cytarabine and anthracycline. The cell line is characterized by a high degree of heterogeneity and is highly sensitive to chemotherapy. KHOS-240S is a cell line that is highly sensitive to chemotherapy, particularly to cytarabine and anthracycline. The cell line is characterized by a high degree of heterogeneity and is highly sensitive to chemotherapy.

Organism Human
Tissue Leukemia
Disease Acute Myeloid Leukemia
Synonyms KHOS240S

Cell Line Characteristics

Age 13 years
Gender Male
Ethnicity Caucasian
Morphology Leukemia cells
Growth properties High proliferation rate, sensitive to chemotherapy

References and Safety

Citation KHOS-240S (Cell Line) | Cytion 300433
Biosafety level 1
NCBI_TaxID 9606
CellosaurusAccession CVCL_2544
