

SCC-7 | 305622

SCC-7

Description	SCC-7 (SCC-VII) is a highly tumorigenic cell line derived from a spontaneous mammary adenocarcinoma of a C3H mouse. It is a highly tumorigenic cell line derived from a spontaneous mammary adenocarcinoma of a C3H mouse. SCC-7 is a highly tumorigenic cell line derived from a spontaneous mammary adenocarcinoma of a C3H mouse. SCC-7 is a highly tumorigenic cell line derived from a spontaneous mammary adenocarcinoma of a C3H mouse. SCC-7 is a highly tumorigenic cell line derived from a spontaneous mammary adenocarcinoma of a C3H mouse.
Organism	Mouse
Tissue	Mammary gland
Disease	Adenocarcinoma
Synonyms	SCC-7, SCC-VII, SCC-7, SCC-7, SCC-7

SCC-7

Breed/Subspecies	C3H
Age	Adult
Gender	Male
Morphology	Epithelial
Growth properties	Adherent

SCC-7

Citation	SCC-7 (SCC-VII) Cytion 305622
Biosafety level	1
NCBI_TaxID	10090
CellosaurusAccession	CVCL_V412
