

CellA72 | 602398

CellA72

Description	CellA72 is a cell line derived from a patient with a rare form of cancer. It is characterized by its high proliferation rate and its ability to form spheroids in culture. The cells are highly sensitive to certain chemotherapeutic agents, making them a valuable model for studying drug response in this type of cancer. CellA72 is a cell line derived from a patient with a rare form of cancer. It is characterized by its high proliferation rate and its ability to form spheroids in culture. The cells are highly sensitive to certain chemotherapeutic agents, making them a valuable model for studying drug response in this type of cancer.
Organism	Human
Tissue	Adipose
Disease	Adiposarcoma
Synonyms	72, A-72

CellA72

Breed/Subspecies	Human
Age	8 weeks
Gender	Male
Morphology	Adipocytes
Growth properties	High proliferation rate, forms spheroids

CellA72

Citation	A72 (CellA72) Cytion 602398
Biosafety level	1
NCBI_TaxID	9615
CellosaurusAccession	CVCL_3453

CellA72

Virus susceptibility
