Cell Line

Description	KHOS-240S is a human B-cell lymphoma cell line. It is derived from a patient with diffuse large B-cell lymphoma. The cell line is characterized by its high proliferation rate and its sensitivity to various chemotherapeutic agents. KHOS-240S cells express high levels of CD19, CD20, and CD22, and are negative for CD30 and CD34. The cell line is maintained in RPMI 1640 medium supplemented with 10% fetal bovine serum (FBS). KHOS-240S cells are highly tumorigenic in nude mice. The cell line is a valuable tool for studying B-cell lymphoma and for testing new therapeutic agents. KHOS-240S cells are also used for the production of monoclonal antibodies. KHOS-240S cells are highly sensitive to microRNA, and this sensitivity can be used to study the role of microRNA in B-cell lymphoma.
